

1. Identify the 11 body systems, the major organs that comprise them and the general functions of the organ system. Fill in the table below.
2. Identify the key organs of that make up these body systems on the torso models.

Body System	Major Organs	General Functions
1. Integumentary		
2. Skeletal		
3. Muscular		
4.		
5.		
6.		
7.		
8.		
9.		
10.		
11.		

3.

Draw a crude representation of the major organs of the 11 body systems on the diagrams below.

5

Label the body cavities and identify 1 organ in each cavity ( You may want to wait on organ ID until you have completed your fetal pig dissection).
